info@rotifer.com.tr

since
2007

Our History

2007

Rotifer Aquaculture was founded by Prof. Dr. Gökay Atilla Albaz and his son, mechanical engineer Salih Albaz. The main motive was to overcome the monopoly of the artemia importer in Turkey to reach a reasonable pricing strategy. By doing so the sea bream and sea bass hatcheries in Turkey might reduce their costs and had the chance of competing in an international arena to streamline their export activities. This goal was achieved in a very short time and enabled domestic sea bream and sea bass producers to meet affordable brine shrimp by achieving a 50% decrease in prices.

2008

Started to import "fish food" for aquariums.

2011

Moved to a new location with of 800 sqm enclosed area in an industrial zone. Received the production license with the number YK-TR-350002 and started to pack fish food. At the same year, ROTIFISH became the first registered brand of the company, and started to be used for fish food.

2015

ROTIPET was created as the second registered brand of Rotifer for pet products. Bird toys with the registered slogan of "For our big hearted little friends !" started to be manufactured.

2019

With the investment on new machines, hamster toys took their place in the product line of the company.

2021

High quality cardboard cat scratchers started to be manufactured

2022

Company went through a big construction at the end of which the available space for warehousing and manufacturing expanded to 2,700 m².

2024

Proud to announce that our big-hearted little friends, are having fun with high quality, natural and ergonomic models of Rotipet in more than 14 countries all around the world.

Ready,steady,go !

When we entered in the aquaculture industry with my father, it was clear, that it will not be limited to only one sector. In the second year of our foundation, we started packaging food for aquarium fishes. Then we found ourselves manufacturing toys, mineral and calcium blocks for birds.

Afterwards we started producing hamster toys. We dsicovered that "pet world" is truly magical. And it is great to be a part of this world. When we discovered that our machines are able to cut cardboard, we found ourselves in the cat scratchers business. It is very enjoyable to serve pet owners and our little friends. It seems they also love our products. Our journey which started with only two, continuing with more than 35 people in a 2700 m2 facility, 2 warehouses and a "big hearted little friend named "Yoda.

I am not so sure about our future steps in regard of new machines or maybe a new facility, but I am 100% sure that the next catalogue will be full of new models, happiness and most probably a new product line!

General Manager

A handwritten signature in blue ink, appearing to be 'Julien', written in a cursive style.

Cotton Ropes, Wooden Beads, and More...

The starting point for all the products you see in this catalogue is designing items that contribute to the healthy physical development birds. While at the same time ensure fun ! All wooden beads and sticks used in toys are coloured with paints suitable for food contact. All our products are handmade with utmost care using, 100% cotton yarns, natural woods, jutes, recycled cardboards, bird sand, and safe acrylic materials. In this and all our future catalogs, we promise not to offer you any product that we wouldn't use for our own pets at home.

We know that birds love to destroy; therefore, indestructible toys go against a bird's nature and are boring. They need to chew, hang, hold and play. That's why we only use cotton ropes, natural wooden beads, food grade painted wooden accessories, colourful acrylic shapes & mirrors, mineral and calcium objects in the bird toys.

In the wild, birds spend hours hunting and playing, that fills much of their day. At home, they get served food easily, leaving the rest of their day dull. *Boredom in birds can lead to issues like feather picking and constant squawking.* That's why a good collection of toys will provide hours of entertainment and exercise for your inquisitive bird.

Now is the time to discover the cozy world of Rotipet Birds...

Rotipet.

Birds are extremely intelligent animals...

That's why toys are an important part of their mental health, and physical responsiveness.

Toys target to encourage exercise and provide good wear for the beak and nails. Birds who spent most of their times in cages are motivated

to hold, hang, explore and chew by the variety of organic and attractive collection of Rotipet bird toys. Do not forget to focus on toys your bird enjoys and avoid overcrowding the cage.

Focus on rotating toys every few days to keep your bird engaged and prevent monotony.

RTP705

ITEM CODE: RTP705

DIMENSION
16.5x10.5x6CM

Flower shaped calcium blocks

Calcium and mineral blocks play a crucial role in supporting bird health and assuming significant roles during the breeding seasons. Here are the contributions of these blocks to bird health and to the reproductive processes:

Mineral Supplementation: Calcium blocks are designed to provide essential minerals that may be lacking in birds' regular diets. These minerals are vital for bone health, eggshell formation (in breeding birds), muscle function, and overall physiological processes. Calcium is a major component of the mineralized structure of eggshells. Female birds require an adequate supply of calcium to deposit in the eggshells, ensuring they are strong and capable of protecting the developing embryo inside.

RTP558

ITEM CODE: RTP558

DIMENSION
16.5x10.5x6CM

—
Rounded mineral blocks
—

Beak Maintenance: Some mineral blocks have a hard texture that encourages birds to peck at them with their beaks. This natural pecking behaviour helps maintain the health of their beaks. Especially for birds with continuously growing beaks, this behaviour can prevent overgrowth.

Entertainment and Enrichment: Mineral blocks can serve as a source of mental stimulation and physical activity for birds. Pecking at or manipulating the blocks can reduce boredom and stress. This is particularly important for birds in captivity, mimicking natural behaviours for a more fulfilling environment.

Dental Health: Playing with mineral blocks can contribute to the dental health of birds. It ensures the natural wear of their beaks, preventing potential dental problems.

Behavioural Benefits: Offering birds various textures and materials is important for mimicking natural behaviours. Mineral "blocks contribute to the overall behavioural diversity of captive birds, creating a more natural and satisfying environment."
