

## FOR HAMSTERS

Hamsters are very popular pets, however they must be handled carefully to become socialized. A good care for hamsters mainly includes exercises. Thus, they need to run in and outside the cage each day. Since they are nosy and spend a great deal of time in their cages, they need to be provided with mentally stimulating toys. Hamsters that are not offered enriching toys may chew on their own hair or skin, gnaw on cage bars, and break teeth, or overeat from boredom.

As Rotifer, we started to make hamster toys to support their activity from MDF, since 2021. This is a fresh and fascinating area for us. As we learn more and more about hamsters, we are developing new products for their needs. Keep watching us!
